

Clearing the TI-83+ Graphing Calculator with the TestGuard Application

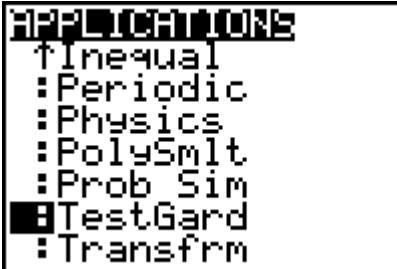

The TestGuard application allows teachers to clear both the RAM memory and the application memory on student calculators very quickly. After the initial setup of the teacher calculator student calculators can be cleared with one keystroke. The Testguard application must be installed on the teacher calculator. This application will only clear TI-83+ or TI-83 graphing calculators. Contact TI-Cares at 1-800-842-2737 or ti-cares@ti.com to obtain the TestGuard application.

The following steps are done on the teacher's calculator once in order to setup the application.

1. Press APPS

2. Arrow to TestGuard

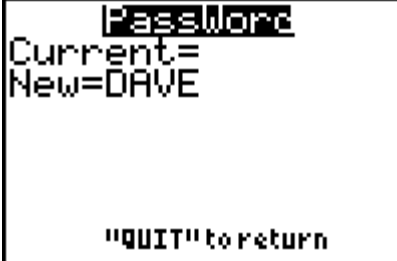

TestGuard allows the teacher to enter a password that shows up on the student calculator so that the teacher will know that the memory has actually been cleared.

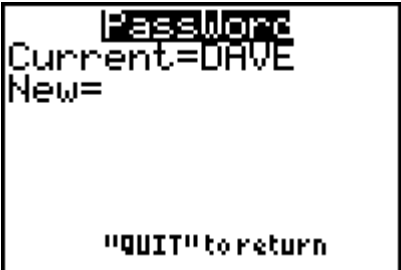

3. Press 2

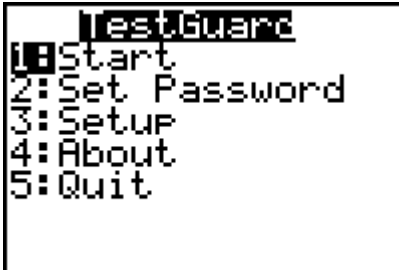

4. Type your password

5. Press Enter

6. Press 2nd MODE to quit

7. Press 3

8. Arrow to MODE

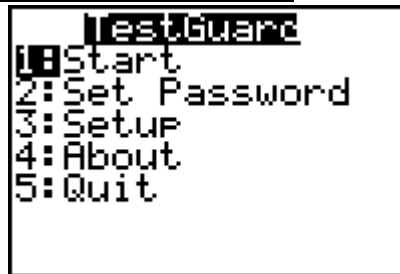

9. Arrow to BOTH

10. Press ENTER

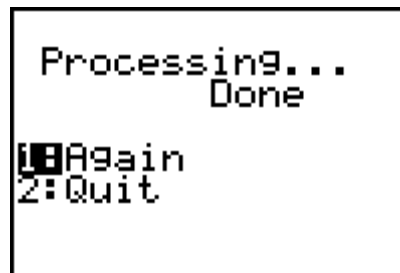

11. Press 2nd MODE to quit

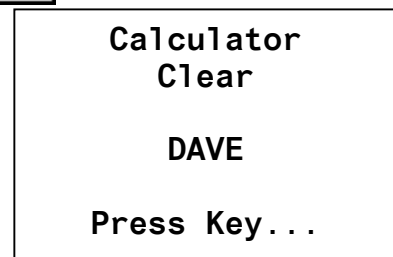

The teacher calculator is now ready to begin clearing student calculators. Connect the teacher calculator and the student calculator with a link cord.

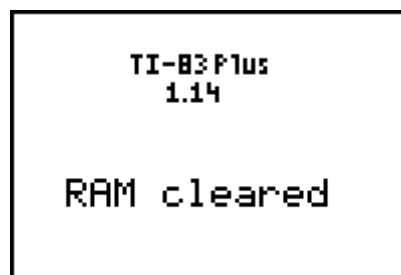

1. Press 1 to Start on the teacher calculator

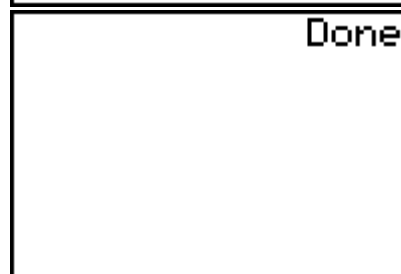

2. The student screen should look like this except with your password

3. Press ENTER on the student calculator

4. Press ENTER on the student calculator

To clear additional calculators link them to the teacher calculator and press 1 on the teacher calculator to run TestGuard again.
